GR Disc Holders

Reliable Mounting Solution for GR Replaceable Graphite Discs

GR holders are meticulously designed to ensure maximum reliability for DonadonSDD rupture discs. Our GR holders, specifically designed for GR replaceable graphite disc mounting, provide a secure and efficient mounting solution for industrial applications.

Keyfeatures & technical benefits

- Internal diameter sized to allow full opening of the disc and total transmission on the minimal discharge area.
- External tangent diameter to the bolts for easy centring between flanges.
- Complete with graphite seals for effective sealing performance
- The flow arrows on the holder and rupture disc tags confirm proper flow direction.

Why Choose DonadonSDD?

- The two flanged graphite parts provide durability and resistance to aggressive fluids, ensuring longevity and performance in challenging industrial applications.
- DonadonSDD GR disc holders are designed for ease of installation, facilitating efficient and hassle-free disc mounting.

TECHNICAL DATA

TYPE	GR
DISC COMPATIBILITY LIST	GR
DIMENSIONS	From DN25 (1 inch) to DN200 (8 inches)
